PARTS & ACCESSORIES

At Power Probe, we believe things should be simple. That's why we design tools to make complex automotive technology accessible for the modern auto technician. As automotive technology continues to evolve, Power Probe will provide innovative Technology, Energy, and Knowledge solutions for technicians and consumers alike.

Circuit Testing and Diagnostic Tools

Tools to provide fast electrical testing and short circuit tracing. Based on the success of the past, our tools are now made simpler and easy to use.

Tools & Accessories

Workplace Improvement Tools including butane torches, wireless temperature probes, IR thermometers, modular work lights, cordless and butane soldering kits.

MGL is a global group of companies operating locally. We manufacture test and measurement products for the electrical and automotive industry, from the entry level through high tech products. Our companies work globally, serving our customers worldwide. This global network delivers a deeper understanding of each individual market, with solutions tailored to the unique requirements of each customer.

With customers over 20 years old, our goal is to be a recognized, honest and fair company. We aim to be the most valued partner for our customers in the research, development, manufacture and supply of innovative, modern and customer-focused technologies. We have a highly experienced team which is openminded, receptive to new ideas and adaptive to evolving market trends.

This solid foundation guarantees that we are well informed and fully equipped to deliver excellent solutions to meet our customers' real needs.

NEW PRODUCTS

INSULATION TESTER & MULTIMETER **INT500**

- ✓ **Full function 1kV Insulation & Earth bond Resistance Tester**
- ✓ **600V DC & AC (TRMS) measurement**
- ✓ **Bluetooth connection with Power Probe connect APP**
- ✓ **0.1nF to 10uF Capacitance measurement**

SKU NO.	EAN Code	UPC Code

NEW PRODUCT

4,000 Count Display

High Voltage / Pass Indicator

Ω / V / 4 Insulation / Common Input

PACKAGING

CASE

Color Box : 240 x 180 x 73 mm

Carton Box : 573 x 403 x 274 mm

Amount / Box : 15 PCS

Includes

- Remote Probe
- Alligator Clips
- Alkaline Battery
- Instruction Manual
- Test Leads
- Magnetic Hanging Kit
- Protective Holster
- Carry Bag

OVERVIEW

INT500 Insulation and Earth-bond Resistance (Continuity) tester is not only a must-have for electricians, but with multiple features and wide ranges of automotive, motor testing, electrical installation, etc.

Features are:

Insulation Test with PI/DAR/Timed, mA-selectable mode/Auto bi-direction Continuity Test, visual/acoustic Compare Function, Auto AC/DC Voltage Test with LPF and 1500 records of Store/Recall

CIRCUIT TESTERS

CIRCUIT TESTERS

PPBASIC

- ✓ **4 mm banana jack and removable tip**
- ✓ **Easy replaceable power switch**
- ✓ **20 ft. extendable power lead**
- ✓ **Switch latch for constant power**
- ✓ **2 separate LED indicators**
- ✓ **Automatic circuit breaker reset**
- ✓ **Ergonomic housing design**

SKU NO.	EAN Code	UPC Code
PPBASICCBINT	8435394788111	878253003099

OVERVIEW

Upon connecting the instrument to the vehicle's battery, you can detect if a circuit is Positive, Negative or Open. You can do this by probing it and observing the RED or GREEN LED. To quickly activate electric components, press the power switch to activate. It is short circuit protected. Continuity of switches, relays, diodes, fuses and wires are easily tested by connecting them between the auxiliary ground lead and the probe tip. To confirm continuity, observe the GREEN LED. Check fuses and test for short circuits. Find faulty ground connections instantly. The 20 foot lead will reach from bumper to bumper and it has the option to connect an additional 20 foot extension cable to make it reach up to 40 feet. Great for trucks, trailers and motorhomes.

PP3

- ✓ **DC voltmeter indicators provide active feedback**
- ✓ **Bad ground indicator**
- ✓ **Short circuit indicator**
- ✓ **Relay and component tester**
- ✓ **Audible monitoring of electrical signals**

OVERVIEW

The original Power Probe 3 uses a 20ft cable which attaches to the vehicle's battery, allowing the user to perform an electrical test anywhere in, or around the vehicle. The PP3 is a Voltmeter and Continuity Tester, with Audible & Visual indicators along with two LED headlights to light up your work area. This circuit tester also supplies Battery Voltage or Ground to activate components. This powerful time-saver tool is perfect for every level of technician.

MASTER COMBO KIT PPKIT03S

- ✓ **DC voltmeter indicators provide active feedback (PP3)**
- ✓ **Audible monitoring of electrical signals (PP3)**
- ✓ **Works on cars, boats, RV's, light duty, heavy duty trucks, and trailers (ECT3000)**

SKU NO.	EAN Code	UPC Code
PPKIT03S	8435394784830	816724020060

OVERVIEW

The Power Probe 3 Master Combo Kit combines the Power Probe 3, PPECT3000 and various accessories to provide the ultimate combination of diagnostic and circuit testing capabilities.

The Power Probe 3 provides simplified testing of Motors, Lights, Relays, Sensors, as well as supplying Power and Ground for functional component testing on or off the vehicle. The PPECT3000 will help you trace short and open circuits quickly and accurately.

CIRCUIT TESTERS

PP3EZ

- ✓ **Includes EZ learning & diagnostics**
- ✓ **Flip screen mode displays readings 180°**
- ✓ **Quickly test fuses & circuits for voltage in VDC mode**
- ✓ **Adjust the AC threshold setting to audio circuits or AC signals**

OVERVIEW

The PP3EZ includes all the powerful testing modes and features of the Power Probe 3S plus now includes 2 new modes - EZ Learning Mode and EZ Diagnostics Mode. The PP3EZ speeds you through the diagnosing of 12 to 24 volt automotive electrical systems. After connecting the PP3EZ's clips to the vehicle's battery, the automotive technician can determine at a glance, the voltage level and the polarity of a circuit without running for a voltmeter or reconnecting hook-up clips from one battery pole to the other. The power switch allows the automotive technician to conduct a positive or negative battery current to the tip for activating and testing the function of electrical components without wasting time with jumper leads.

OVERVIEW

The Power Probe IV is the next generation of Power Probe Circuit Testers. Now loaded with powerful multi-meter functions, advanced diagnostic test modes, an easy to read color LCD display and a new rugged water and dust resistant housing, the Power Probe IV is designed to give you years of trouble free testing, even in the most demanding work environments.

The unique configuration of Power Probe testers gives them many advantages over using conventional test lights or multimeters for circuit testing.

- ✓ **Locate short circuits without removing plastic panels, molding, and carpet**
- ✓ **Find short to ground circuits, switches, or breaks in wires**
- ✓ **Test and find intermittent conditions**
- ✓ **Sensitivity adjustment from 1-8 in (3-20 cm)**

OVERVIEW

We designed the ECT3000 as a quick solution to your automotive circuit problems. The ECT3000 consists of 2 main components. An Intelligent transmitter and a Intelligent receiver along with a set of connection adapters that will help you :

- Locate short circuits without unnecessarily removing plastic panels, molding, and carpet.
- Trace wires to see where they lead
- Find open circuits, switches or breaks in wires
- Trace and locate the cause of a severe battery drain
- Test and find intermittent conditions
- Check continuity with the assistance of the Power Probe 3, 4, or Hook

These features are extremely handy for the professional technician. An appropriate schematic or wiring diagram is always useful and many times necessary when tracing circuits. The better you understand your circuit, the better the ECT3000 can assist you.

OVERVIEW

The No-Contact Thermometer detects the infrared rays that an object emits. The instrument focuses the infrared energy of the object through the lens and onto a sensor. As a result, the instrument changes the surface temperature into an electrical signal, and a microcomputer calculates and displays the measured temperature on the LCD.

OBD-II BREAKOUT BOX PPECB

SKU NO.	EAN Code	UPC Code
PPECB	8435394784823	816724021869

- ✓ **Test DLC (OBD port) for any abnormalities, such as shorting and reverse polarity at the pins before connecting other diagnostic equipment to DLC**
- ✓ **Quickly access all 16 pin connections during repair and diagnosis of the vehicle**

ACCESSORIES

OBD-II BREAKOUT BOX
PIN ADAPTERS
PPTK0048

OVERVIEW

The Power Probe OBD-II Breakout Box is a CAN Bus circuit tester compatible with 12 and 24 Volt systems. The tool connects directly into the Vehicle's Data Link Connector (DLC) testing for any abnormalities such as shorting and reverse polarity at the pins. If shorting or reverse polarity is present, connecting the PPECB first will prevent harm before connecting a Diagnostic Scan Tool. The Breakout Box provides a live display of present communicating signals without having to use a Digital Multimeter. Additionally, you can quickly test the voltages at all 16 pins.

Color Box : 196 x 140 x 60 mm

Carton Box : 370 x 365 x 300 mm

Amount / Box : 20 PCS

Includes

- Digital Multimeter
- 600mA Fuse
- K-Type Temp Probe
- AAA Batteries x3
- 10A Fuse
- Alligator Clips
- Magnetic Hanging Strap
- Instruction Manual
- 5 ft (2 m) CAT-IV 600V Test Leads

OVERVIEW

This CAT-IV 600V Automotive Digital Multimeter by Power Probe is versatile, accurate and rugged with Large LCD Screen with Bright Backlight. Measures AC/DC Voltage and Current, Resistance, Frequency, Temperature, and Capacitance.

Includes

- Two 5ft (1.5 m) Test Leads
- Soft Carrying Case
- AAA Batteries x3

OVERVIEW

The Power Probe Digital Clamp Meter is an 80amp, auto-ranging clamp meter designed specifically for the automotive technician. This meter is rated CAT III 600V and can measure Volts, Amps, Ohms, Frequency and Temperature, necessary for automotive electrical testing.

This meter's diagnostic applications include (but are not limited to) Parasitic Draw, Crank Current testing and HVAC Temperature testing.

OVERVIEW

THE PROBE 12-Volt Test Light with Haptic Feedback, (PPTACT1CS) this tool vibrates and lights when voltage over 12 volts is detected.

When a voltage is below 12 volts, this functions as a standard test light. Just push the button and go! Shows positive voltage, ground, and continuity "all in one tool" with haptic advantage. It has a cable of 86 cm long.

OVERVIEW

PPAMP is an adapter that is plugged into PP products with 4mm banana plugs (such as THE MAESTRO / PP4 / PP3 / PP3EZ , etc.). This adapter is used as a measurement tool for DC currents. It is mainly used for PP products, such as automotive fan circuit detection, to find the part of the circuit failure, in order to replace and repair.

OVERVIEW

The adapter can be set for the output 0 - 100% pulse width drive waveform by pressing the key. It is mainly used for such as automotive fan circuit detection, to find the part of the circuit failure, in order to replace and repair. PPPWM is an adapter that is plugged into PP products with 4mm banana plugs (such as THE MAESTRO / PP4 / PP3 / PP3EZ , etc.).
